

method 1 «Android» :

- 1** Start by downloading the «petscan» app. 

- 2** Enable bluetooth on your phone.

- 3** Turn on the chip reader by pressing the button «1».

- 4** Press the button «2» to open the settings menu.

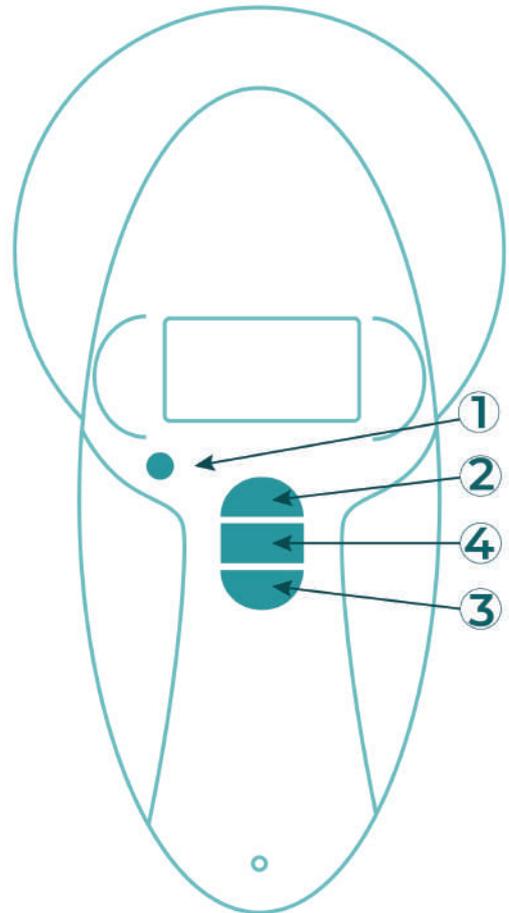

- 5** Press the button «4» to confirm.

- 6** Press the button «3» until you get to «bluetooth» then press the button «4» to confirm.

- 7** Navigate with the buttons «2» and «3» until you get to «BLE» then press the button «4» to confirm.

- 8** Your phone should detect «REALTRACE», connect to it then open the app, you should be automatically connected. if it's not the case, press «connect reader».

If it fails to connect, refer to method 2 (on the back)

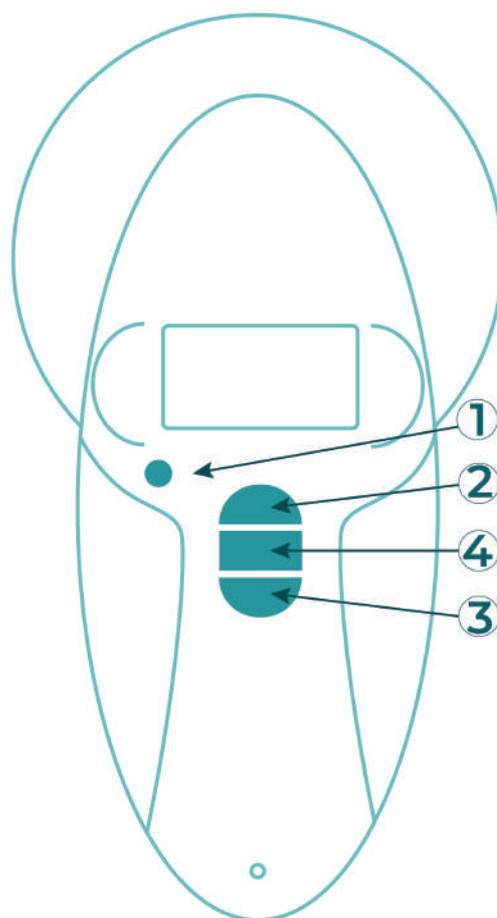

Once the first connection is established, the reader will automatically reconnect when you turn it on and you only have to press on «connect reader» (make sure the bluetooth is activated on your phone)

Method 2 «IOS» : or fail of the method 1

- 1** Start by downloading the «petscan» app. 
- 2** Enable bluetooth on your phone.
- 3** Turn on the chip reader by pressing the button «1».
- 4** Press the button «2» to open the settings menu.
- 5** Press the button «4» to confirm.
- 6** Press the button «3» until you get to «bluetooth» then press the button «4» to confirm.
- 7** Navigate with the buttons «2» and «3» until you get to «HID» then press the button «4» to confirm.
- 8** Your phone should detect «HID», connect to it.
- 9** Repeat step 4 to 6 then navigate with the buttons «2» and «3» until you get to «BLE» then press the button «4» to confirm.
- 10** Open the «petscan» app, you should be automatically connected. if it's not the case, press «connect reader».
